

# PLAY FOR CHANGE

YOUTH EXCHANGE 25 - 2 NOVEMBER

Erasmus+ youth exchange 'Play for Change' was the second exchange of this year, right after Green Choice, it also took place on the sunny island Curaçao.

This time the countries of Georgia and Finland has join us.

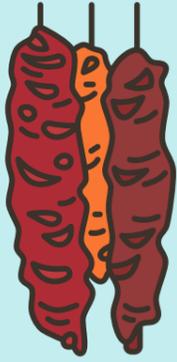

The group's arrived on the 25th of October and were ready to enjoy our 'local' food truck. Even though they did some long traveling they woke up the next morning with alot of energy to do some 'morning activities'. After that the first day went as all the others with energizers, agreement's and get to know each other.

As for this project's topic it was all about living a healthy lifestyle, being a good citizen and changes you can make in your community to make it better. During this week we dived into it and also talked about the personal experiences we have with anything health related.

Mental health was also a big part of this topic especially after going through such a year being isolated from the world.

Integration also went well, on culture night everybody got even more connected, Finland is a must visit so we can experience the built in saunas for ourselves. And Georgia is the place to be if you into hiking.

The participant's together with local kids also made a basketball plaque for the Bida Nobo youth center, we used the talent of some participants to create something from scratch, that is sustainable and that we can call ours. The kids used the creativity by painting their hands with different colors and paste this on the board.

We also went to Bida Nobo youth center to give back to the community; they held a service day where everybody from the community comes together and do a big clean up of the church and center. The playground was also used by the participants to play sports with the children.

**This project was a success!**
