

Green Choice

ERASMUS+ YOUTH
EXCHANGE

What did we do?

On this project we learned a lot about having green and sustainable businesses by pitching business ideas, learning how to carry out those ideas with sessions involving marketing, circular economy, funding and we even simulated a "green" Wall Street.

Besides that we visited Willemstad where we played a "City game", and got introduced to the streets, food, history and culture

We had a lot of fun exploring Curaçao, but also spending quality time with each other and learning new things about each other's way of living

Who are we?

Green Choice is a youth exchange project supported by the Dutch National Agency being hosted in Willemstad, Curaçao with three different organizations from Georgia, Croatia and Curaçao.

Our project's main focus is bringing awareness towards climate change and how we can improve it. On this project we have learned circular and sustainable economy, critical thinking when it comes to purchasing products and trusting companies and overall how to live green

Co-funded by the Erasmus+ Programme of the European Union

When the exchange part of the project ends we will start smaller actions in our community using everything we have learned on the exchange so with small steps, we can make the world a better place
