

Week 1 - Report

It's only been one week and my passion for Curaçao is already starting to make my heart beat out of my chest. These days we have had the opportunity to get to know the island by visiting its highlights, trying its amazing beaches, and eating its tasty food.

Workwise, I have experienced a few things being different from what I am used to - working approaches, requirements, working time, thus appreciating new working environments and policies.

As you can see from the pictures above, I work for the Kids in Motion school and for Dierenbescherming Curaçao, an entity working for animal protection. Very satisfied of my choice!
